OBJECTIVE

My career goal is to work as a Software Developer in both challenging and dynamic environment which will allow me to contribute in design and development of first class software solutions both modern and reliable for company's customers.

EXPERIENCE

.NET DEVELOPER - LUMEN • APRIL 2019 – PRESENT

As part of the Financial Intelligence Department I am responsible for design, development and deployment of tools that reduce manual workload of colleagues from Financial Department.

Projects I worked on to this date:

- Automation processing of the invoices coming by email – 90% manual task reduction – total of 120 hours saving per month for the Financial Department – total saving of £15000.00 per month.
- Monthly reporting tool that submits Tax Reports along with invoice scans to external company – total saving £18000.00 per year.
- API services that handle data provided by third party companies – total saving of 90 hours per month.
- Dynamic Intake Forms – development of internal website that renders JSON definition of the intake form provided from SQL Server utilising Angular and .NET Core Web API frameworks.

EDUCATION

MASTER OF CIVIL ENGINEERING • 2014 •
WEST POMERANIAN UNIVERSITY OF
TECHNOLOGY IN SZCZECIN, POLAND

BACHELOR OF CIVIL ENGINEERING •
2012 • WEST POMERANIAN UNIVERSITY
OF TECHNOLOGY IN SZCZECIN, POLAND

SKILLS

Software Languages:

C#

SQL

Typescript

Technologies Used:

CSS

Software Frameworks:

ASP.NET Core

.NET

Angular 9

NUnit

Main Tools:

MS Visual Studio

SQL Server Management Studio

VS Code

Others:

TFS
