Experience

April 2019 – Present

Lumen | London, UK

.NET Developer

As part of the Financial Intelligence Department, I am responsible for design, development and deployment of tools that reduce manual workload of colleagues from Financial Department.

Projects I worked on to this date:

- Automation processing of the invoices coming by email – 90% manual task reduction – total of 120 hours saving for the Financial Department.
- Monthly reporting tool that submits Tax Reports along with invoice scans to external company – total saving £1500.00 per month.
- Various API services that handle data provided by third party companies – total saving of 90 hours per month.
- Dynamic Intake Forms – development of internal website that renders JSON definition of the intake form provided from SQL Server utilising Angular and .NET Core Web API
- Sales Pricing Solution – implemented solution that allowed sales representatives provide accurate pricing for customers based on corporate regions. This allowed to win 5% more contracts in EMEA.

November 2016 – March 2019

Lidl | London, UK

PROJECT MANAGER

- Responsible for tender, design and construction on distribution centres and stores around UK.
- Directly managed store construction projects with value up to £7,000,000.00.
- Implemented new management practices such as snagging application that reduced time input of both contractors and client significantly.

Private Projects

My website – <https://www.pawelmaslak.com/>

“Business Card” website

A simple website outlining more about me, my projects, providing means of contact and allow to view my CV.

- Typescript, Angular, SCSS
